

Agent Orange

Hook: TMC 811s size 6-8

Thread: Orange

Weight: Lead Wire

Body: Orange Chenille

Wing: Orange Krystal Flash with grizzly hackle

Step 1 Wrap thread onto hook shank. Then wrap lead wire onto shank and secure with thread and tie in orange chenille.

Step 2 Tie in about 10 strands of orange Krystal Flash slightly longer than hook.

Step 3 Tie in grizzly hackle longer than hook.

Step 4 Tie in grizzly hackle on other side. Whip Finish.

This is a salt-water pattern for bonefish. It is also an effective carp fly as it imitates a crayfish that carp can't resist. However, this fly has taken both large and smallmouth bass along with rock bass and bluegills. It can be fished up-stream or dead drifted in the current. It is most effective in still water and can be tied with bead head eyes to fish it in deeper water.
